Clinical Asst Professor Medicine

Sidney Kimmel School of Medicine

COVID-19

- SOB , cough , fever , headache
- Less often-- nausea, vomiting ,diarrhea
- 14 day incubation (min 2, avg 5, max 14)
- Infectious – risk of transmission
 - 24 – 48 hour before sx
 - Peak with cough
 - unlikely 7 days post disease

COVID-19 Fatality Rate by AGE

Transmission

- Mode of transmission
 - Droplet (not airborne)
 - Hand/mouth/eyes
 - Surfaces- minimal risk
- Risk of transmission (40% asymptomatic)
 - 11 % household
 - 4.5 % close contact (work)
 - 8% shared meals
 - < 0.1 % grocery store/distancing
 - < 0.1 % outdoors- ventilated

Prevalence

- Delaware -9000 positive /1 million population (0.9%)
 - 9000/55,000 tested (17 %)
 - Testing – RT -PCR swab
 - Antibody – inadequate data
- Surrogate markers
 - Hospitalizations
 - Percent positive tested
 - Epidemic curve
