## INTRODUCTION

---

*The 2004 State Liability Systems Ranking Study* was conducted for the U.S. Chamber Institute for Legal Reform among a national sample of in-house general counsel or other senior litigators at public corporations. This study was conducted between December 2003 and February 2004, updating previous research conducted in December 2002 to February 2003 and January to February 2002. The goal was to explore how reasonable and fair the tort liability system is perceived to be by U.S. business. Broadly, the survey focused on perceptions of state liability systems in the following areas:

- Tort and Contract Litigation
- Treatment of Class Action Suits
- Punitive Damages
- Timeliness of Summary Judgment/Dismissal
- Discovery
- Scientific and Technical Evidence
- Judges' Impartiality and Competence
- Juries' Predictability and Fairness

### METHODOLOGICAL OVERVIEW

All interviews for *The 2004 State Liability Systems Ranking Study* were conducted by telephone among a nationally representative sample of senior attorneys at companies with annual revenues of at least \$100 million. Interviews averaging 18 minutes in length were conducted with a total of 1,402 respondents and took place between December 5, 2003 and February 5, 2004. The sample was segmented into two main groups. Of the 1,402 respondents, 141 were from insurance companies, with the remaining 1,261 interviews being conducted among public corporations.

This year we increased the overall number of people interviewed by over 50% as compared to last year's sample (n=928). The larger sample sizes have made the survey more reliable, and have reduced year-to-year fluctuations that might have been caused by small sample sizes in the past.

A detailed survey methodology including a description of the sampling and survey administration procedures as well as further respondent profile information is contained in Appendix A. The complete questionnaire is found in Appendix B.

## NOTES ON READING TABLES

The base (“N”) on each question is the total number of respondents answering that question. An asterisk (\*) on a table signifies a value of less than one-half percent (0.5%). A dash represents a value of zero. Percentages may not always add up to 100% because of computer rounding or the acceptance of multiple answers from respondents answering that question. Note that in some cases results may be based on small sample sizes. Caution should be used in drawing any conclusion from results based on these small samples.

States were given a grade (“A”, “B”, “C”, “D”, “F”) by respondents for each of the key elements of their liability systems. Tables show the ratings of the states by these grades, the percentage of respondents giving each grade, and the mean grade for each element. The mean grade was calculated by converting the letter grade using a 4.0 scale where “A” = 4.0, “B” = 3.0, “C” = 2.0, “D” = 1.0, “F” = 0.0. Therefore, the mean score displayed can also be interpreted as a letter grade. For example, a mean score of 1.8 could be seen as roughly a “C-” grade.

For the “Ranking on Key Elements” tables, states were ranked by their mean grades on that element. Ties between states with matching mean grades were ranked by looking at the percentage of “A” grades.

The “Overall Ranking of State Liability Systems” table was calculated by creating an index using the scores given on each of the key elements. All of the key element items were highly correlated with one another and with overall performance. The differences in the relationship between each item and overall performance were trivial, so it was determined that each item should contribute equally to the index score. The index was created from the mean across the 10 items which was rescaled from 0 to 100 prior to averaging them together.

## PROJECT RESPONSIBILITY AND ACKNOWLEDGEMENTS

The Harris team responsible for the design and analysis of *The State Liability Systems Ranking Study* included Humphrey Taylor, Chairman, *The Harris Poll*, David Krane, Senior Vice President, and Diana Gravitch, Research Manager. We would like to acknowledge Andrew R. Stephens from the U.S. Chamber Institute for Legal Reform and Judyth Pendell of Pendell Consulting, LLC, for their invaluable contributions to the design, content, focus and analysis of the project. Harris Interactive is responsible for the final determination of topics, question wording, collection of the data, statistical analysis and interpretation in the report.

## PUBLIC RELEASE OF SURVEY FINDINGS

All Harris surveys are designed to comply with the code and standards of the Council of American Survey Research Organizations (CASRO) and the code of the National Council of Public Polls (NCPP). Should data from the survey be released to the public, any release must stipulate that the complete report is also available.

## EXECUTIVE SUMMARY

---

Stories of excessive or frivolous litigation appear frequently in the popular press, and Congressional debates have been ongoing for years on issues surrounding legal reform. However, information about business views and impressions of the nation's civil justice system and what impact these have on decision-making has been largely anecdotal. *The 2004 State Liability Systems Ranking Study* was conducted for the U.S. Chamber Institute for Legal Reform among a national sample of in-house general counsel or other senior litigators to explore how reasonable and fair the tort liability system is perceived to be by U.S. business. The 2004 study provides an updated picture of the findings from the last surveys released in 2003 and 2002.

Interviews conducted between December 5, 2003 and February 5, 2004 with 1,402 senior corporate attorneys found that some states stand out as leaders in creating a fair and reasonable litigation system, but **the majority (56%) of those surveyed give an overall ranking of fair or poor to the state court liability system in America – compared to 65% in 2003.** Further, and perhaps more importantly, an **overwhelming 80% report that the litigation environment in a state could affect important business decisions** at their company, such as where to locate or do business. [See Tables 1 and 2]

Respondents were first screened for their familiarity with states and those who were very or somewhat familiar with the litigation environment in a given state were then asked to evaluate that state. It is important to remember that **courts and localities within a state may vary a great deal** in fairness and efficiency. However, respondents had to evaluate the state as a whole. To explore the detailed nuances within each state would have required extensive questioning for each state and was beyond the scope and purpose of this study. However, other studies have demonstrated this variability within a state. For example, several studies have documented very high class-action activity in certain county courts such as Madison County, Illinois and Jefferson County, Texas, revealing that these counties have “magnet courts” that are extremely hospitable to plaintiffs. Thus, it is possible that some states received low grades due to the negative reputation of one of their counties or jurisdictions.

Respondents were asked to give states grades (“A”, “B”, “C”, “D” or “F”) in each of the following areas: tort and contract litigation, treatment of class action suits, punitive damages, timeliness of summary judgment/dismissal, discovery, scientific and technical evidence, judges’ impartiality and competence, and juries’ predictability and fairness. These grades were combined to create an **overall ranking of state liability systems.**<sup>1</sup>

---

<sup>1</sup> The “Overall Ranking of State Liability Systems” table was calculated by creating an index using the scores given on each of the key elements. All of the key element items were highly correlated with one another and with overall performance. The differences in the relationship between each item and overall performance were trivial, so it was determined that each item should contribute equally to the index score. The index was created from the mean across the 10 items, which was rescaled from 0 to 100 prior to averaging them together.

According to the U.S. businesses surveyed, the **states doing the best job of creating a fair and reasonable litigation environment are Delaware, Nebraska, Virginia, Iowa, and Idaho. In 2003, the top five were Delaware, Nebraska, Iowa, South Dakota, and Indiana. The bottom five states today are Mississippi, West Virginia, Alabama, Louisiana, and California – compared to 2003, when the bottom five states were Mississippi, West Virginia, Alabama, Louisiana, and Texas.** [See Table 3]

States were also ranked by each of the key elements making up the overall grade.<sup>2</sup> While some states remained leaders across the elements, some states stood out as getting particularly high or low ratings on certain elements.

- For **overall treatment of tort and contract litigation**, today the top five states are: Delaware, Nebraska, Virginia, Iowa, and Utah. In 2003, the top five consisted of Delaware, Iowa, Nebraska, North Dakota, and South Dakota. Today the bottom five states are: Mississippi, West Virginia, Alabama, Louisiana, and California. In 2003, the bottom five states were: Mississippi, West Virginia, Alabama, Louisiana, and Texas. [See Table 7]
- For **treatment of class actions**, today the top five states are: Delaware, Iowa, South Dakota, Idaho, and Nebraska. In 2003, the top five consisted of Delaware, Nebraska, Iowa, Indiana, and South Dakota. The bottom five states today are: West Virginia, Alabama, Louisiana, California, and Illinois. In 2003, the bottom five states were: West Virginia, Alabama, Louisiana, Texas, and California. [See Table 8]
- For **punitive damages**, today the top five states are: Delaware, Virginia, Iowa, Indiana, and Idaho. In 2003, the top five states consisted of: Delaware, Iowa, North Dakota, Virginia, and New Hampshire. The bottom five states today are: Mississippi, Alabama, West Virginia, California, and Illinois. The bottom five states in 2003 were: Mississippi, West Virginia, Alabama, Texas, and California. [See Table 9]
- For **timeliness of summary judgment/dismissal**, today the top five states are: Delaware, Virginia, Nebraska, Iowa and New Hampshire. In 2003, the top five states consisted of: Delaware, Iowa, South Dakota, Nebraska, and Utah. The bottom five states are: Mississippi, West Virginia, Alabama, Louisiana, and California. In 2003, the bottom five states were: Mississippi, West Virginia, Louisiana, Alabama, and Hawaii. [See Table 10]
- For **discovery**, today the top five states are: Delaware, Virginia, Nebraska, New Hampshire, and Wisconsin. In 2003, the top five consisted of: Delaware, Nebraska, Iowa, North Dakota, and Indiana. The bottom five states today are: Mississippi, West Virginia, Alabama, Louisiana, and

---

<sup>2</sup> For the “Ranking on Key Elements” tables, states were ranked by their mean grades on that element. Ties between states with matching mean grades were resolved by looking at the percentage of “A” grades.

California. The bottom five states in 2003 were: Mississippi, West Virginia, Louisiana, Alabama, and Hawaii. *[See Table 11]*

- For handling of **scientific and technical evidence**, today the top five states are: Delaware, Virginia, New York, Minnesota, and Idaho. In 2003, the top five states consisted of: Delaware, Minnesota, New York, Utah, and Virginia. The bottom five states today are: Mississippi, West Virginia, Alabama, Louisiana, and Arkansas. In 2003, the bottom five states were: Mississippi, West Virginia, Alabama, Louisiana, and Arkansas. *[See Table 12]*
- For **judges' impartiality**, today the top five states are: Delaware, Iowa, Nebraska, New Hampshire, and Virginia. In 2003, the top five states consisted of: Delaware, Nebraska, Iowa, Connecticut, and South Dakota. The bottom five states today are: Mississippi, West Virginia, Alabama, Louisiana, and Texas. In 2003, the bottom five states were: Mississippi, West Virginia, Alabama, Louisiana, and Texas. *[See Table 13]*
- For **judges' competence**, today the top five states are: Delaware, Virginia, Minnesota, Iowa, and Utah. In 2003, the top five states were: Delaware, Minnesota, Iowa, Nebraska, and Wisconsin. The bottom five states today are: Mississippi, West Virginia, Alabama, Louisiana, and Montana. In 2003, the bottom five states were: Mississippi, West Virginia, Louisiana, Alabama, and Texas. *[See Table 14]*
- For **juries' predictability**, today the top five states are: Nebraska, North Dakota, Delaware, Iowa and South Dakota. In 2003, the top five states were: Nebraska, Iowa, North Dakota, Wisconsin, and Utah. The bottom five states today are: Mississippi, California, West Virginia, Alabama, and Louisiana. In 2003, the bottom five states were: Alabama, Mississippi, California, Louisiana, and West Virginia. *[See Table 15]*
- For **juries' fairness**, today the top five states are: Iowa, Nebraska, Delaware, North Dakota, and Minnesota. In 2003, the top five states were: North Dakota, Iowa, Nebraska, Delaware, and South Dakota. The bottom five states today are: Mississippi, Alabama, West Virginia, Louisiana, and California. In 2003, the bottom five states were: Mississippi, West Virginia, Alabama, Louisiana, and Texas. *[See Table 16]*

The study also asked respondents to name the most important issue that state policymakers who care about economic development should focus on to improve the litigation environment in their state. The leading two issues named were reforming punitive damages (cited by 24% of respondents in 2004, compared to 33% of respondents in 2003) and tort reform (cited by 17% of respondents in 2004, compared to 19% of respondents in 2003). Other top issues were limitation of class action suits (cited by 6% of respondents in 2004, compared to 3% in 2003), speeding up the trial process (cited by 3% of respondents in 2004, compared to 2% of respondents in 2003), judicial competence (cited by 3% in 2004, compared to 5% in 2003), limitation of liability settlements

(cited by 3% in 2004, compared to 5% in 2003), the elimination of unnecessary lawsuits (3% both today and in 2003), and the issue of fairness and impartiality (cited by 3% in both 2004 and 2003). *[See Table 4]*

In the 2004 survey the respondents were asked for the first time which five local jurisdictions have the least fair and reasonable litigation environments. The worst jurisdiction was Los Angeles, California (mentioned by 16% of the attorneys), followed by the New York Greater Metropolitan Area, Madison County in Illinois, and San Francisco, California (each cited by 9% of the respondents), and Cook County (Chicago) in Illinois (cited by 6% of the respondents). Other jurisdictions mentioned by the respondents were California (various other jurisdictions)<sup>3</sup>, New Orleans City/Parish in Louisiana, and Dade County (Miami) in Florida (each cited by 5% of the respondents). Three out of ten (29%) mentioned a jurisdiction in California and 16% mentioned a jurisdiction in Illinois. *[See Table 5]*

Also asked for the first time in the 2004 survey were questions about the legislative reforms recently enacted in Mississippi, West Virginia, and Texas. Over half of the respondents who evaluated Mississippi and Texas thought that the new laws, if implemented as intended, are likely to improve the litigation environment (53% of the attorneys who evaluated Mississippi and 52% of the attorneys who evaluated Texas). In contrast, almost half of the respondents who evaluated West Virginia (47%) reported that they are not sure whether the legislative reforms recently enacted there will have an impact on the litigation environment in the state. *[See table 17]*

Of those attorneys who expect the litigation environment in Mississippi and Texas to improve as a result of the reforms, pluralities have seen only moderate improvement so far (38% of the respondents who evaluated Mississippi and 41% of the respondents who evaluated Texas). Of the same group, 60% expect meaningful or major improvement in Texas, 51% expect meaningful or major improvement in Mississippi, and only 45% expect meaningful or major improvement in West Virginia. *[See Table 17]*

In summary, it seems that given the earlier noted finding on the potential influence of these perceptions on business decision-making, the impact of these perceptions on state economic development could be significant. While these findings only reflect the perceptions of in-house general counsel or other senior corporate litigators, and some states may have better litigation environments than they are perceived to have, W. I. Thomas once noted that, “Those things that are believed to be real are real in their consequences.”

---

<sup>3</sup> \*Note: Respondents mentioned a wide variety of other jurisdictions in California, but no single jurisdiction predominated, so these responses are listed as “California (various other jurisdictions)”.

Missouri (various other jurisdictions)*	1
Boston, Massachusetts	1
	Total
	%
California (sum of all mentions)	29
Illinois (sum of all mentions)	16

\*Note: The responses displayed in this table were volunteered by the respondents.

\*Note: Respondents mentioned a wide variety of other jurisdictions in the following states: California, Louisiana, Florida, New Jersey, Pennsylvania and Missouri. Because no single jurisdiction predominated within these states, these responses are listed as "[state name] (various other jurisdictions)".

## INDIVIDUAL STATE RANKINGS

(IN ALPHABETICAL ORDER)

### Notes on reading the tables:

The following tables show the individual state rankings. For each state, the 2004 overall state ranking is shown. Also displayed is the number of evaluations of each state (shown as the “N=xxx”).

Respondents who evaluated each state were first asked to rate the following elements of a state liability system: tort and contract litigation, treatment of class action suits, punitive damages, timeliness of summary judgment/dismissal, discovery, scientific and technical evidence, judges’ impartiality and competence, and juries’ predictability and fairness.

Then, respondents were asked whether there was any other element that is critical to the liability system of the state they were evaluating. If respondents could identify another element, this response was recorded along with the number of respondents (N) who provided this response. The top five responses shown are labeled as “Additional Volunteered Items” on each individual state table on the following pages. The number of people who provided volunteer responses is very small (less than 50) and therefore caution should be exercised when interpreting the findings from these items.

An asterisk (\*) on a table signifies a value of less than one-half percent (0.5%). A dash represents a value of zero. Percentages may not always add up to 100% because of computer rounding or the acceptance of multiple answers from respondents answering that question. Note that in some cases results may be based on small sample sizes. Caution should be used in drawing any conclusion from results based on these small samples.

## **APPENDIX A: METHODOLOGY**

## METHODOLOGY

---

### AN OVERVIEW

*The 2004 State Liability Systems Ranking Study* was conducted for the U.S. Chamber Institute for Legal Reform by Harris Interactive Inc. The final results are based on interviews with a nationally representative sample of 1,402 in-house general counsel attorneys or other senior litigators at companies with annual revenues of at least \$100 million. Interviews averaging 18 minutes in length were conducted by telephone and took place between December 5, 2003 and February 5, 2004.

### SAMPLE DESIGN

A representative sample of companies with annual revenues of at least \$100 million annually was drawn using IdExec and alert letters were sent to the general counsel at each company. In order to reach the desired number of final interviews, more letters were sent out to potential participants than the final number of completed interviews. These letters provided general information about the study, notified them that an interviewer from Harris would be contacting them and requested their participation. A copy of this letter appears in Appendix B.

The sample was segmented into two main groups. Of the 1,402 respondents, 141 were from insurance companies, with the remaining 1,261 interviews being conducted among public corporations. The proportion of interviews with insurance companies represents 10% of the total sample. Typically, in the universe of companies with \$100 million or more in revenues, insurance companies represent 6% of this population. Since property casualty insurance companies have extensive experience with state liability systems, for the purposes of this study we increased the number of interviews so that these companies would comprise 10% of our completed interviews.

Respondents had an average of 19.5 years of relevant legal experience (including their current position), had been with their company an average of 10.2 years, and had been in their current position an average of 6.6 years.

### TELEPHONE INTERVIEWING PROCEDURES

*The 2004 State Liability Systems Ranking Study* utilized Harris' computer-assisted telephone interviewing (CATI) system. This system greatly enhances reporting reliability. It reduces clerical error by eliminating the need for keypunching, since interviewers enter respondent answers directly into a computer terminal during the interview itself. This data entry program does not permit interviewers to inadvertently skip questions, since each question must be answered before the computer moves on to the next question. The data entry program also ensures that all skip patterns are correctly adhered to. The on-line data editing system refuses to accept punches that are out-of-range, it demands confirmation of responses that exceed expected ranges, and asks for explanations for inconsistencies between certain key responses.

In order to achieve high respondent participation, in addition to the alert letter, numerous telephone callbacks were made in order to reach the respondent and conduct the interview at a convenient time.

Once a qualified respondent was identified, the respondent was first asked about their familiarity with several states. First, 24 states out of the list of 50 possible states were presented to the respondent. Within these 24 states, 17 states presented were the following: Alaska, Arkansas, Hawaii, Idaho, Iowa, Kansas, Maine, Montana, Nebraska, New Hampshire, New Mexico, North Dakota, Rhode Island, South Dakota, Utah, Vermont, and Wyoming. These states were prioritized in order to get a sufficient number of evaluations, since in the past years of this study, data for these states were based on fewer evaluations. The remaining 7 states were randomly selected from the left over states not mentioned above.

Respondents were then given the opportunity to name any other state, aside from the states already presented, with which they are very or somewhat familiar.

If the respondent was very or somewhat familiar with a given state, the respondent was then given the opportunity to evaluate that state's liability system. The respondent had the opportunity to evaluate up to 15 states. If the respondent was familiar with any state from the list of 17 mentioned above, then that state was automatically included. If this number was less than 15, then the balance was randomly selected from the remaining group of states with which the respondent was very or somewhat familiar.

On average, each respondent evaluated 5 states.

#### CHANGES IN RANKINGS

**Overall, the big picture has not changed since last year.** Most states' rankings have changed at least somewhat; however, some changes are more significant than others. Delaware continues to be ranked number one, and the bottom four states (Mississippi, West Virginia, Alabama, and Louisiana) remain the same.

Changes in rank may reflect a variety of factors. First, the litigation environment in the state may have improved or worsened due to such factors as legal rulings, changes in the composition of the bench, or legislative or rulemaking changes that affect litigation. Second, perceptions of the litigation environment in each state may be driven by a variety of subjective assessments such as the reputation of the courts and interviewees' experiences with individual litigation matters. Third, the score may have been affected by changes in sample size. This year, we increased the overall number of people interviewed by over 50%. In some of the less-populated states (Montana, North Dakota, South Dakota, and Wyoming), the sample size roughly doubled. These states had much smaller sample sizes in 2002 and 2003, because it was difficult to find people familiar enough with those states'

legal environments to provide an evaluation. The larger sample sizes have made the survey more reliable, and have reduced year-to-year fluctuations that might have been caused by small sample sizes in the past.

## **SIGNIFICANCE TESTING**

### *Reliability of Survey Percentages*

It is important to bear in mind that the results from any sample survey are subject to sampling variation. The magnitude of this variation (or error) is affected both by the number of interviews—the base size—and by the level of the percentages expressed in the results.

Table B-1 shows the possible sample variation that applies to percentage results for this survey. The chances are 95 in 100 that a survey result does not vary, plus or minus, by more than the indicated number of percentage points from the result that would have been obtained if interviews were conducted with all persons in the universe represented by the sample. For example, if the response for a sample size of 300 is 30%, then in 95 cases out of 100, the response in the total population would have been between 25% and 35% (+/-5%). Note that survey results based on subgroups of small size can be subject to large sampling error.

**Table B-1**  
**Recommended Allowance for Sampling Error of Proportions (Plus or Minus)**

<b>Sample Size</b>	<b>Survey Percentage Result</b>				
	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
900	2	3	3	3	3
800	2	3	3	3	3
700	2	3	3	4	4
600	2	3	4	4	4
500	3	4	4	4	4
400	3	4	4	5	5
300	3	5	5	6	6
200	4	6	6	7	7
100	6	8	9	10	10
50	8	11	13	14	14

***Significance of Differences Between Proportions***

Sampling tolerances are also involved in the comparison of results from different surveys or from different parts of a sample from the same survey (subgroup analysis). Table B-2 shows the percentage difference that must be obtained before a difference can be considered statistically significant. These figures, too, represent the 95% confidence level.

To illustrate, suppose the two percentages in question are 34% and 25%. More specifically, suppose that one group of 300 has a response of 34% “yes” to a question, and an independent group has a response of 25% to the same question, for an observed difference of 9 percentage points. According to the table, this difference is subject to a potential sampling error of 6-7 percentage points. Since the observed difference is greater than the sampling error, the observed difference is significant.

**Table B-2**  
**Sampling Error of Difference Between Proportions**  
Approximate Sampling Tolerances (at 95% Confidence Level)  
To Use in Evaluating Differences Between Two Percentage Results

	Survey Percentage Result				
Sample Sizes	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
900 v. 900	3	4	4	5	5
500	3	4	5	5	6
300	4	5	6	7	7
200	5	6	7	8	8
100	6	8	10	10	10
50	9	11	13	14	14
500 v. 500	4	4	6	6	6
300	4	6	7	7	7
200	6	7	8	8	8
100	7	9	10	11	11
50	9	12	13	14	15
300 v. 300	5	6	7	8	8
200	5	7	8	9	9
100	7	9	10	11	11
50	9	12	14	15	15
200 v. 200	6	8	9	10	10
100	7	10	11	12	12
50	9	12	14	15	15
100 v. 100	8	11	13	14	14
50	10	14	16	17	17
50 v. 50	12	16	18	19	20

Sampling error of the type so far discussed is only one type of error. Survey research is also susceptible to other types of error, such as refusals to be interviewed (non-response error), question wording and question order, interviewer error, and weighting by demographic control data. Although difficult or impossible to quantify these types of error, the procedures followed by Harris Interactive, Inc. keep errors of these types to a minimum.

**APPENDIX B: ALERT LETTER AND QUESTIONNAIRE**

INSERT NAME  
INSERT TITLE  
INSERT ADDRESS

Dear INSERT MR/MS LAST NAME

The U.S. Chamber Institute for Legal Reform has asked Harris Interactive, an independent survey research firm, to repeat an important annual study that examines state liability systems across America. You may have participated in one of the earlier waves. Or, you may have seen some of the substantial media attention about the study in national newspapers and numerous legal journals.

This year your participation is just as critical because we have selected only a small sample of attorneys to share their opinions. Within the next few days, you will be contacted for an opportunity to participate in this important study and we would appreciate your taking a few minutes to respond.

The purpose of this study is to see how state civil justice systems across America are perceived by corporate decision-makers, such as yourself, in terms of their reasonableness, fairness and predictability. As in previous years, the results of this research will be shared with key state policy makers and those who care about economic development in their state to help inform them about how they are viewed in relation to other states. The research has played an important role in encouraging state legislators and judges to re-evaluate the condition of their state liability system and stimulate discussion on how states might improve their litigation environments.

Your answers will be kept confidential and will be used only in combination with those of other survey participants. *To thank you for your participation, we will be sharing an executive summary of the findings with survey respondents.*

We will be calling you within the next few days, but in the meantime, if you have any questions or would like to schedule a time to speak with us, please feel free to call us at 1-800-387-3614 with the reference number that appears at the bottom of this letter. Thank you.

The views, opinions and experiences of attorneys like you have made this study a resounding success in past years. Anticipating your cooperation, I'd like to thank you for your help.

Sincerely,

Humphrey Taylor  
Chairman

**BASE: ALL RESPONDENTS**

**Q205** Hello, I'm \_\_\_\_\_ from *The Harris Poll*. We have been commissioned by the United States Chamber of Commerce to conduct a survey among attorneys and would like to include your opinions. This study will examine state liability systems and will take about 10 minutes of your time. To thank you for your qualified participation in this study, we would like to send you an executive summary of the findings. Is this a convenient time for you? If not, we'd be glad to call you back at another time.

(INTERVIEWER NOTE: IF RESPONDENT SAYS NOW IS NOT CONVENIENT, ASK: "WOULD YOU LIKE TO SET UP ANOTHER TIME OR IF YOU PREFER YOU CAN CALL US WHEN YOU WOULD LIKE TO COMPLETE THE SURVEY?")

(INTERVIEWER NOTE: IF NECESSARY SAY, BECAUSE ONLY A SMALL SAMPLE OF SENIOR CORPORATE COUNSEL HAVE BEEN SELECTED, YOUR REPLY IS MOST IMPORTANT TO THE SUCCESS OF THIS SURVEY. YOUR ANSWERS WILL BE KEPT CONFIDENTIAL AND WILL BE USED ONLY IN AGGREGATE WITH THOSE OF OTHER SURVEY PARTICIPANTS.)

(INTERVIEWER NOTE: IF NECESSARY SAY, "WE RECENTLY SENT YOU AN ALERT LETTER ABOUT THE SURVEY." IF REQUESTED, THE LETTER CAN BE EMAILED OR FAXED TO RESPONDENT.)

(1816)

**[FROM ALL STATES THAT RESPONDENT IS VERY OR SOMEWHAT FAMILIAR WITH  
[Q300/1-50 AND Q301/1,2) AND/OR (Q305/1-50)], PRIORITY SELECT UP TO 15 STATES WITH LOWEST COUNTS TO DATE FOR EVALUATION IN SECTION 400. IN THIS SELECTION, ALL SMALL STATES – THOSE LISTED IN PROGRAMMER NOTE ABOVE Q300 – SHOULD BE INCLUDED IN THIS PRIORITY SELECT. THE REMAINING STATES NEEDED TO TOTAL TO 15 SHOULD BE RANDOMLY SELECTED FROM THE STATES LEFTOVER AFTER THE SMALL STATES HAVE BEEN INCLUDED. IF VERY OR SOMEWHAT FAMILIAR WITH ANY STATE**

**SECTION 400: STATE EVALUATIONS**

[PROGRAMMER NOTE: ASK Q400-420 UP TO 15 TIMES FOR EACH STATE PRIORITY SELECTED FROM (Q300/1-50 & Q301/1,2) & Q305/1-50.]

**BASE: VERY OR SOMEWHAT FAMILIAR WITH AT LEAST ONE STATE (AT LEAST 1 FROM Q305/1-50 OR (Q300/1-50 & Q301/1,2))**

**Q400** Now I'd like to ask for your opinions about [IF VERY OR SOMEWHAT FAMILIAR WITH ONLY ONE STATE SHOW "the state"; OTHERWISE SHOW "some of the states"] with which you are familiar. I'm going to read a number of key elements of state liability systems. For each item, I'd like you to grade [INSERT STATE] on how well you think they are doing.

[PROGRAMMER NOTE: SHOW ABOVE TEXT ONLY FOR 1<sup>ST</sup> STATE; FOR EACH SUBSEQUENT STATE SHOW: "Now, I'd like you to grade [INSERT STATE] on how well you think they are doing."

An "A" means they are doing "an excellent job at creating a fair and reasonable litigation environment" and an "F" means that they are doing "a failing job at creating a fair and reasonable environment". How would you grade [INSERT STATE] on (READ EACH ITEM) . . . "A", "B", "C", "D", or "F"?

(INTERVIEWER NOTE: READ ABOVE SCALE, THAT IS THE PARAGRAPH ABOVE, ONLY AS MANY TIMES AS NECESSARY)

<b>Q401</b>	1	2	3	4	7	8	9
	<u>"A"</u>	<u>"B"</u>	<u>"C"</u>	<u>"D"</u>	<u>"F"</u>	Not Sure (v)	Decline to Answer (v)

[RANDOMIZE]

**Q440** Could it ever happen that the litigation environment in a state could affect an important business decision at your company, such as where to locate or do business? (DO NOT READ LIST)

(2879)

- 1 Yes, could affect important business decision
- 2 No, could not affect important business decision
- 8 Not sure (v)
- 9 Decline to answer (v)

**BASE: ALL QUALIFIED RESPONDENTS**

**Q445** Thinking of the country as a whole, which 5 local jurisdictions do you think have the least fair and reasonable litigation environment for both defendants and plaintiffs? (INTERVIEWER NOTE: IF NECESSARY SAY: A JURISDICTION IS CAN BE DEFINED AS A COUNTY OR CITIES.)

[PROGRAMMER NOTE: CAN ACCEPT UP TO 5 RESPONSES]

[TEXT BOX: 1<sup>ST</sup> MENTION] (2880,2881)

[TEXT BOX: 2<sup>ND</sup> MENTION] (2882,2883)

[TEXT BOX: 3<sup>RD</sup> MENTION] (2884,2885)

[TEXT BOX: 4<sup>TH</sup> MENTION] (2886,2887)

[TEXT BOX: 5<sup>TH</sup> MENTION] (2888,2889)

[PROGRAMMER NOTE: THE FOLLOWING QUESTIONS Q450, Q455, AND Q460 ARE ONLY ASKED OF RESPONDENTS WHO WERE GIVEN THE OPPORTUNITY TO EVALUATE MISSISSIPPI, WEST VIRGINIA OR TEXAS. LOOP FOR EACH STATE EVALUATED (ONLY MISSISSIPPI, WEST VIRGINIA & TEXAS) – ASK ALL 3 QUESTIONS FOR 1 STATE, THEN MOVE ON TO NEXT STATE. ALL OTHER RESPONDENTS SHOULD BE SKIPPED TO Q100.]

**BASE: RESPONDENTS WHO HAVE EVALUATED MISSISSIPPI/WEST VIRGINIA/TEXAS**

**Q450** Now we would like to ask you what effect you think the legislative reforms recently passed in (INSERT: Mississippi/ West Virginia/ Texas) have had or likely will have in the future, if they are implemented as intended – would you say the effect is an improved litigation environment, a worsened litigation environment or no effect on the litigation environment?

- |   |                                     |             |               |        |
|---|-------------------------------------|-------------|---------------|--------|
|   |                                     | Mississippi | West Virginia | Texas  |
|   |                                     | (2890)      | (2893)        | (2896) |
| 1 | An improved litigation environment  |             |               |        |
| 2 | A worsened litigation environment   |             |               |        |
| 3 | No effect on litigation environment |             |               |        |
| 8 | Not sure (v)                        |             |               |        |
| 9 | Decline to answer (v)               |             |               |        |

**BASE: IMPROVED LITIGATION ENVIRONMENT IN MISSISSIPPI/WEST VIRGINIA/TEXAS**  
**(Q450/1)**

**Q455** How much improvement has resulted from the reforms so far in (INSERT: Mississippi/West Virginia/Texas) – a major improvement, a meaningful improvement but not major, a moderate improvement or very little improvement?

		Mississippi (2891)	West Virginia (2894)	Texas (2897)
1	Major improvement			
2	Meaningful improvement, but not major			
3	Moderate improvement			
4	Very little improvement			
8	Not sure (v)			
9	Decline to answer (v)
